

Safety Committee Meeting 5/11/22

Brooke Bovard, Steve Harcourt, John DiGiacoma, Simon Hamermesh

Old Business -

Signs - Status of order with Tapco is null. An assortment of signs and materials are possessed and randomly distributed. Installation of signs pending requisition, administrative tasks, and appropriate contracting of labor.

Harvey @ Orleans - Progress on submitted drawings is reviewed. Intention to submit for town review and advocate is agreed upon.

New Business -

Signs - Agree to continue the procurement process through direct contact with vendors (vs online ordering). Discussion on how to manage non-regulated labor in a risk averse manner.

Landscaping - Discussion to understand previous and current responsibilities, including conversation on the committee's priorities. Consensus around visibility of traffic control signage as main priority, both on main roads and in the neighborhood.

It is suggested that organizing a service to do trimming, on main roads and/or in the neighborhood, may be a good use of funds and a service to the neighbors. Consensus is that is not generally necessary and in cases where it may be, is likely to be overly intrusive. Resolve to encourage maintenance, promote understanding, and "adopt" a section of state road is taken up by the Committee.
